Only New Car of the Year at the Show-Sells at \$1395

The automobile shows this year reveal but one new car.

All interest is being centered on the Essex. It is the car the trade has talked of for more than a year. Production was to have begun on the Essex last spring, but conditions delayed the start until

The exhibit includes the cars in the show and the demonstrators that are maintained outside. Everybody is urged to ride in them.

Don't Fail to See the Essex Also Ride In It

The enthusiastic endorsement everyone is giving to the Essex when they see it is emphasized ten-fold when they have ridden in it. So for that reason everyone who stops at the Essex exhibit is also being asked to take a ride in the car. That plan is being followed in connection with every automobile show and at every Essex sales place. More than a quarter of a million have ridden in the Essex.

It is the most talked of car of the year.

Instead of advertising its qualities, the Essex is allowed to speak for itself. Men everywhere are saying the finest things about it.

Has Economy of the Light Car, Comfort and Endurance of the Costliest

People talk of its beauty and the elegance of its appointment. They compare its qualities with those of fine and costly cars. Its lightness is admired because of its advantages in economy of operation. The roughest roads are used to reveal its sturdiness and riding qualities, so rare in light cars. Everyone is surprised at its power, flexibility and acceleration. And those who know other cars of similar weight and price class marvel at its speed.

Since you are going to the automobile show your visit will not be complete unless you see and ride in the Essex.
